6. Since 1998: Investments in the expansion of our production sites in Germany
Goal: Strengthening vertical integration and value creation; reducing supply chain issues
7. Manufacturing and Certification: In-house design and manufacturing, timely implementation of new standards and regulations

 puteus GmbH
Lenenweg 6
D-47918 Tönisvorst

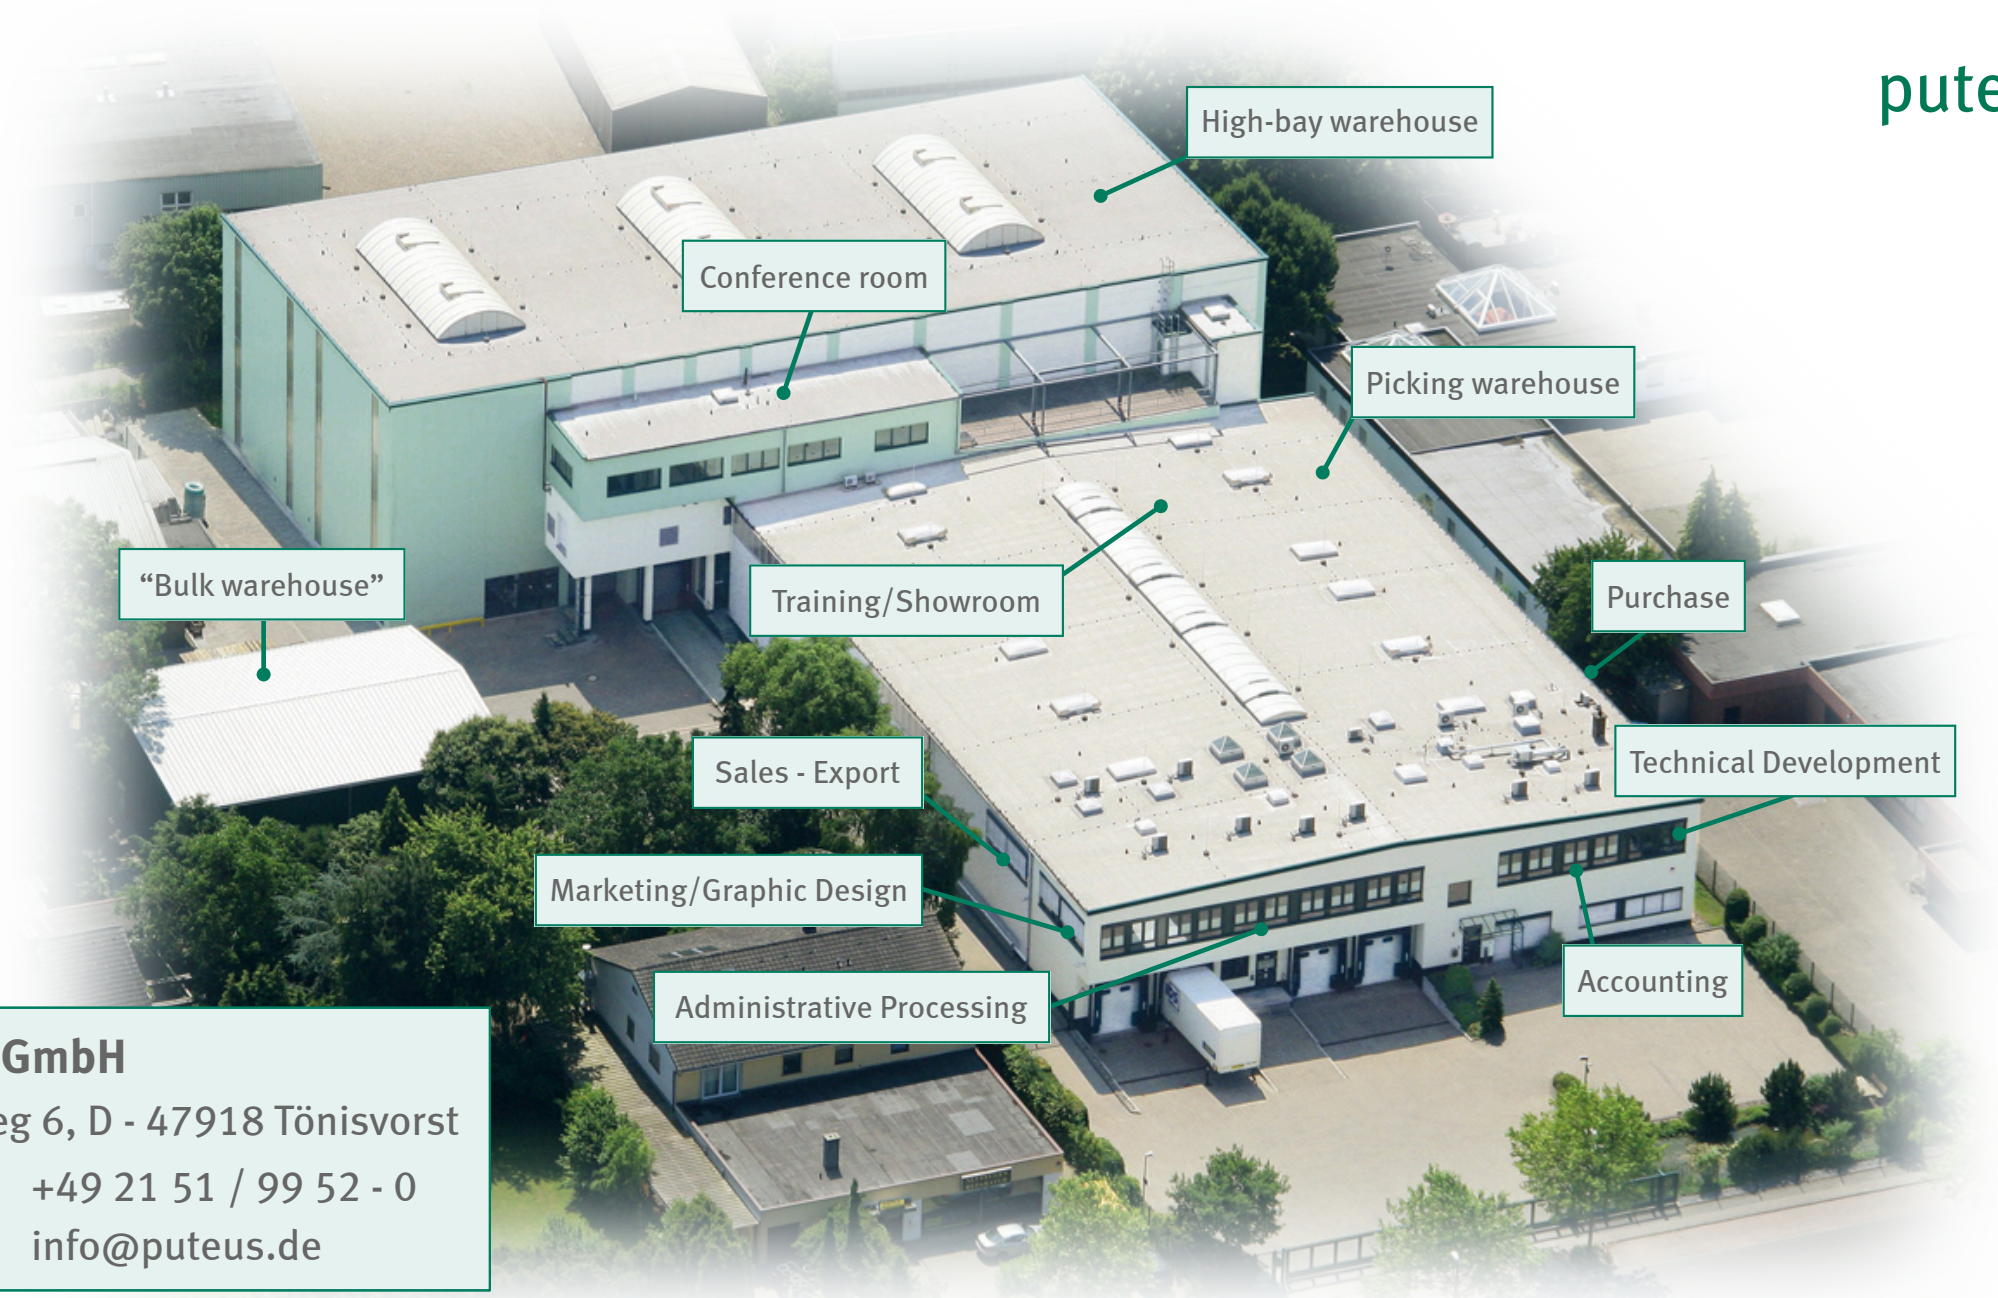

Puteus GmbH is a medium-sized manufacturer of products for the plumbing and irrigation sectors, as well as for industry and the technical trade. The company was founded in 1979 near Düsseldorf and has been based at its current location in Tönisvorst since 1997.

Technical testing facilities and an in-house design department ensure continuous quality control. Our professional, state-of-the-art storage facilities — including a 14-meter-high high-bay warehouse, a large order-picking warehouse, and an additional hall for bulk storage with a total of more than 12,000 pallet spaces—ensure clean and secure storage of our products as well as prompt fulfillment of customer orders.

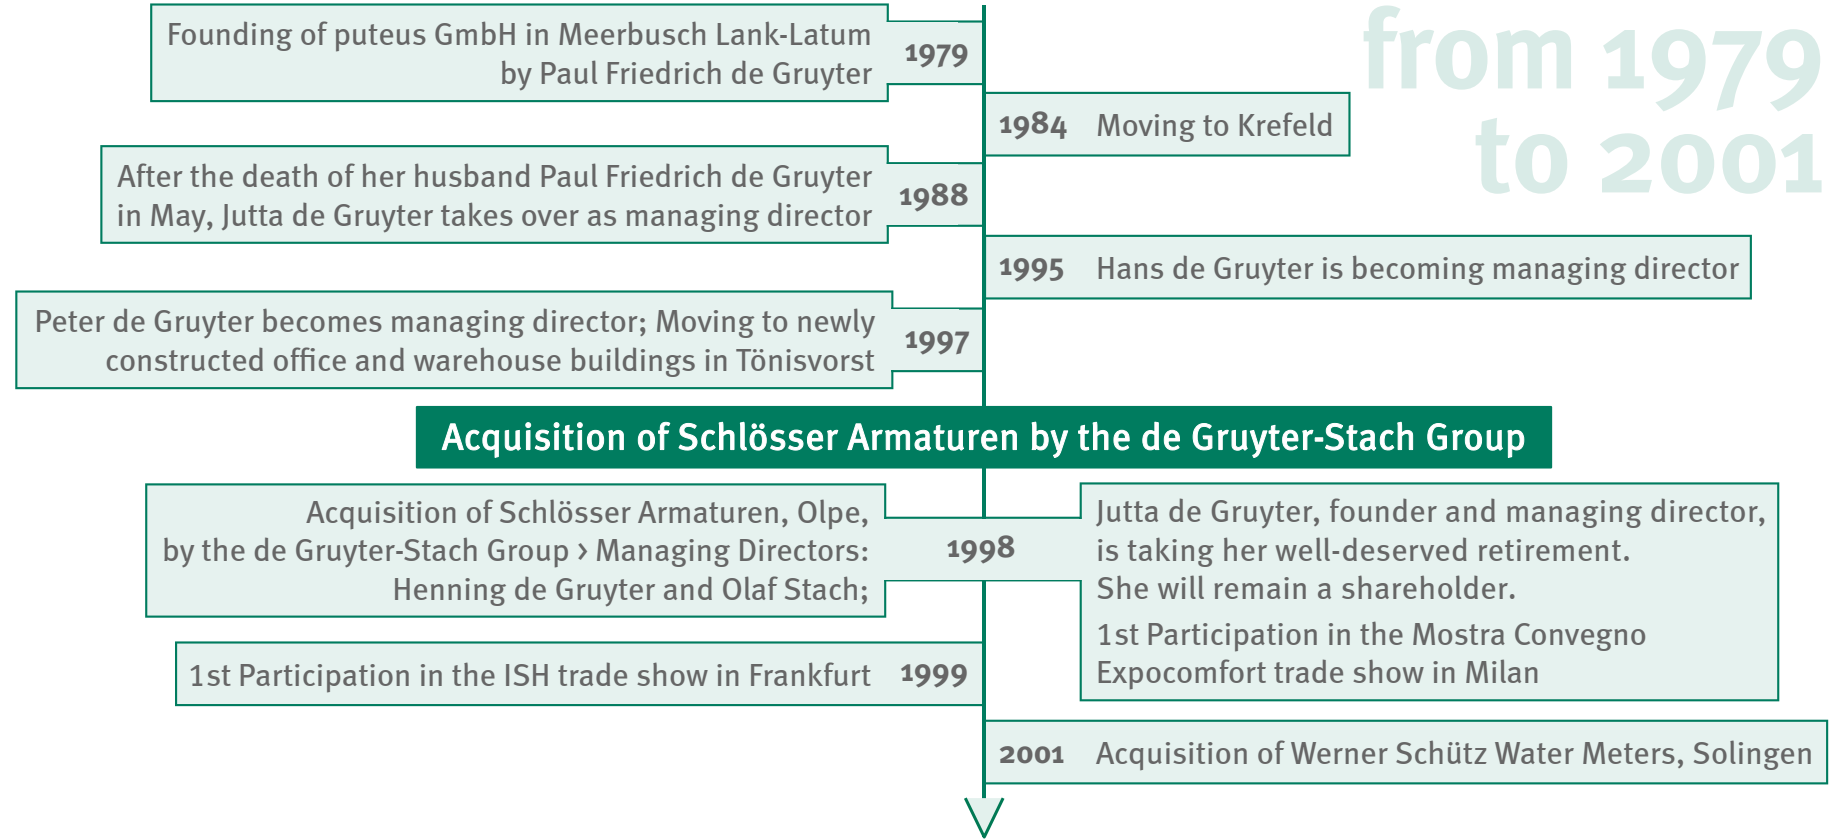

Since 1998, the de Gruyter and Stach families have been investing in the continuous expansion of production sites in Germany with the aim of strengthening vertical integration, increasing value creation, and reducing supply chain issues and dependence on international suppliers.

Our in-house design and manufacturing capabilities at the highest level enable a constant stream of new technical developments as well as the timely implementation of new standards and regulations. This also strengthens our position in the area of regulatory approvals.

Our concept for sustainability

The pillars of sustainability

Corporate Social Responsibility (CSR)

Our Cycle of sustainability for future generations

We bear responsibility not only for our own generation, but also for future generations.

This principle is at the heart of everything we do!

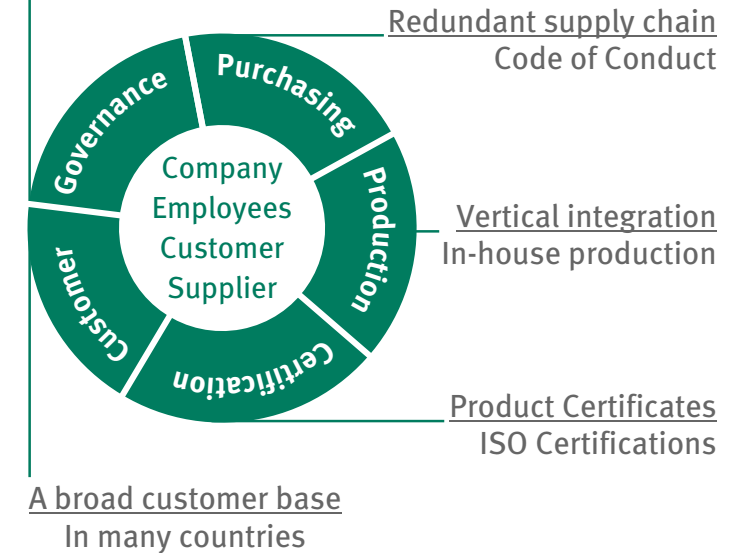

With this in mind, we align our business practices, our use of resources and our approach to the environment, as well as our social responsibilities, with this goal – to ensure that life in the future is just as good, or even better.

Our Cycle of sustainability for future generations

IT	Environment & Certification	Energy	Controlling
IT-Security (including certification)	ISO certification	Energy consumption	Detailed data collection
Network Infrastructure	Hygiene and Drinking Water Regulation	Energy procurement	Productivity analyses
PIM (Product Information Management)	Occupational safety and product safety	Growing self-sufficiency – self-production	Purchasing control
BIM (Building Information Modeling)	Environment	Substitution Gas/Electricity	Sales controlling

Compliance IT
Product Safety

puteus has been testing for a long time now all materials we use to ensure the **highest levels of safety and hygiene**. We take appropriate measures to ensure that nickel levels remain below the **permitted limits**. For this reason, our products undergo **regular inspections**. We can substantiate this with our **ISO certifications**.

Certified sustainability as a corporate philosophy

... for customer satisfaction and a future-proof business orientation.

Quality i.a.w. DIN EN ISO 9001

Environment i.a.w. DIN EN ISO 14001

Occupational health and safety
i.a.w. DIN EN ISO 45001

Import and export controls

Material i.a.w. UBA List

Compliance with nickel limits,
product certifications

Material compliant with French
drinking water regulations
